

Extensive UI & Feature User Manual

Authoritative Standard Operating Procedure (SOP)
Role-Based Operational Guide for Administrators, Presenters/Managers, and Team Members

Document Version: 1.0.0 Enterprise	Target Audience: Admins, Presenters, Members
System Core: React Agile Tracker	Theme Compatibility: Light & Dark Mode
Last Updated: September 2026	Classification: Operational Standard

1. System Overview & Platform Architecture

TTL Tracker (Task & Team Lifecycle Tracker) is an enterprise agile project management and team productivity workspace. It unifies real-time Kanban planning, project health analytics, daily remark logs, attachment management, user workload tracking, and security audit logging into a single cohesive web application.

The platform enforces strict role-based access control (RBAC) across three primary user tiers:

- **Normal User (Member):** Focused on daily task execution, updating Kanban status, submitting daily work logs, and uploading deliverables.
- **Presenter (Manager):** Focused on executive reviews, monitoring project health, analyzing team workload balance, presenting breakdown modals, and exporting CSV metrics.
- **Administrator (Admin):** Full system governance including project space creation, user onboarding, role management, security audit log analysis, and workspace archival.

2. Comprehensive Permission & Access Matrix

The matrix below outlines feature availability across all three user roles:

Feature / Capability	Normal User (Member)	Presenter (Manager)	Administrator (Admin)
View Personal Dashboard & KPIs	■ Assigned Tasks	■ Full Workspace	■ Full Workspace
Kanban Board Drag & Drop	■ Assigned Tasks	■ All Tasks	■ All Tasks
Daily Remarks & Work Logs	■ Allowed	■ Allowed	■ Allowed
Upload Attachments & Links	■ Allowed	■ Allowed	■ Allowed
Task Creation & Editing	■ Assigned Tasks	■ All Tasks	■ All Tasks
Project Health & Metrics	■ Read-only	■ Full Access	■ Full Access
Project Breakdown Modal	■ Read-only	■ Full Access	■ Full Access
Create & Edit Projects	■ Restricted	■ View / Request	■ Full Control
User Workload & Performance	■ Self Only	■ All Team Members	■ All Team Members

User Onboarding & Roles	■ Restricted	■ Restricted	■ Full Control
Activity Audit Center	■ Restricted	■ View Logs	■ Full Control
Export Reports to CSV	■ Restricted	■ Allowed	■ Allowed

3. Role 1: Normal User / Member Guide

As a **Normal User (Member)**, your daily workflow revolves around executing assigned tasks, maintaining clear visibility into your progress, and communicating completed milestones to team managers.

Feature 3.1: Kanban Board Navigation & Drag-and-Drop

1. Click **Kanban** in the left navigation sidebar.
2. Understand the 4 standard Kanban columns:
 - **To Do**: Tasks assigned to you that are ready to begin.
 - **In Progress**: Tasks you are actively working on today.
 - **Testing / Review**: Tasks finished and undergoing quality assurance.
 - **Completed**: Delivered and verified tasks.
3. **Drag-and-Drop Action**: Click and hold any task card, drag it horizontally across columns, and release. The system updates status instantly.

Feature 3.2: Task Details Modal, Daily Remarks & Attachments

1. Click on any task card on the Kanban Board or Task List to open the **Task Details Modal**.
2. **Daily Remarks**: Scroll to the *Daily Remarks* section. Type your detailed progress note in the text box and click **Add Remark**.
3. **File Uploads**: Navigate to *Task Attachments* -> click **Upload File** -> select document (PDF, PNG, JPG, ZIP, DOCX) -> confirm upload.
4. **Web Link Attachments**: Click **Add Link** -> enter external URL (e.g. GitHub Pull Request or Figma design link) and title -> click Save.
5. **Subtask Checklist**: Toggle subtask checkboxes as sub-items are completed.

■ Practical Step-by-Step Example (Member Workflow):

Scenario: Rahul (Software Engineer) starts work on Task #34: Installation of TC Foundation.

- **Step 1:** Rahul opens the **Kanban Board** and drags Task #34 card from **To Do** column into **In Progress**.
- **Step 2:** He clicks Task #34 card to open the Details Modal.
- **Step 3:** Under Daily Remarks, he types: 'Configured server environment and installed prerequisite packages on 10.0.1.5' and clicks **Add Remark**.
- **Step 4:** Under Task Attachments, he clicks **Upload File** and attaches deployment_log_v1.txt.
- **Step 5:** Once server verification completes, he drags Task #34 to **Completed**.

4. Role 2: Presenter / Manager Guide

As a **Presenter / Manager**, your primary responsibility is presenting project milestones to stakeholders, monitoring project health, managing team workload distribution, and identifying bottlenecks.

Feature 4.1: Project Health Indicators & Portfolio Monitoring

1. Click **Projects** in the left sidebar menu.

2. Real-time Project Health Badges are computed automatically as follows:

Health Badge	Color	Trigger Condition / Business Meaning
On Track	■ Emerald Green	Project is running smoothly; target deadline is more than 5 days away .
Due Soon	■ Amber Yellow	Target deadline is within 5 days ; requires close team monitoring.
Overdue	■ Rose Red	Target deadline has passed without status being marked Completed.
Completed	■ Blue / Green	Project space is fully delivered.
On Hold	■ Amber	Project is temporarily paused by leadership.

Feature 4.2: Project Detail & Task Breakdown Modal (Presentation Mode)

1. On the **Projects** table, click the **View Details** button (bar chart icon) or click anywhere on the project row.
2. The **Project Detail Modal** opens instantly, displaying:
 - **Top Header:** Project initials avatar, name, status badge, and project health badge.
 - **Key Metrics Grid:** Total Tasks count, Completion Rate %, Story Points Delivered vs Total, End Target Date.
 - **Assigned Team Members:** Full list of assigned members with avatar icons.
 - **Project Tasks Breakdown List:** List of all linked tasks with IDs, priority badges, story points, and direct links.

Feature 4.3: User Workload & Performance Analytics

1. Click **Users** in the left menu.
2. Click **View Workload & Performance** on any user card to review assigned task volume, completion %, story points delivered, and overdue tasks count.

Feature 4.4: Executive CSV Report Export

1. On **Projects** or **Users** page, click **Export CSV** in the top header.
2. Downloads a formatted CSV containing project IDs, completion %, story points, dates, health status, and member counts.

■ **Practical Step-by-Step Example (Presenter/Manager Review):**
Scenario: Priya (Engineering Lead) conducts the Weekly Executive Review.

- **Step 1:** Priya opens **Projects** and filters by status Active.
- **Step 2:** She identifies a project marked ■ **Due Soon** and clicks **View Details**.
- **Step 3:** During screen sharing, she presents the Project Detail Modal showing 85% completion rate, 45/50 story points delivered, and assigned team members.
- **Step 4:** She clicks **Export CSV** to attach the official summary report to director meeting minutes.

5. Role 3: Administrator (Admin) Guide

As an **Administrator (Admin)**, you hold complete operational governance over the platform: project space creation, user onboarding, role assignments, security audit log tracking, and workspace archival.

Feature 5.1: Project Space Creation & Assignment

1. Navigate to **Projects** page -> click **Create Project** in top action bar.
2. Input Project Name, Status (Active, On Hold, Completed), Start & End Target Dates, and Description.
3. Select assigned Team Members from the multi-select dropdown.
4. Click **Save Project**.

Feature 5.2: User Onboarding, Status & Role Governance

1. Navigate to **Users** page.
2. **Create User**: Click **Add User** -> enter Full Name, Email, Role (Admin, Manager, User), and password.
3. **Edit Role / Status**: Click **Edit** on any user row to change system roles or toggle account status (Active vs Inactive).

Feature 5.3: Security Audit Center & Activity Tracking

1. Click **Activity Center** in the left sidebar menu.
2. Use the filter toolbar to inspect security logs:
 - **Search Bar**: Search logs by keyword or user name.
 - **User Filter**: Filter actions performed by a specific user.
 - **Action Type Filter**: Filter by Task Creation, Project Edit, User Role Change, Login.
 - **Date Filter**: Filter by Today, Last 7 Days, Last 30 Days, or Custom Date Picker.
3. Click any audit log row to launch the **Activity Detail Modal** displaying exact timestamp, IP address, and JSON payload parameters.

■ Practical Step-by-Step Example (Administrator Workflow):

Scenario: Amit (System Admin) onboards a new Senior Manager and sets up a new Project Space.

- **Step 1:** Amit opens **Users** -> clicks **Add User** -> enters Name: 'Ananya Sharma', Role: 'Manager', Status: 'Active'.
- **Step 2:** He opens **Projects** -> clicks **Create Project** -> creates 'Cloud Migration 2026', assigns Ananya as Lead along with 4 engineers.
- **Step 3:** He opens **Activity Center** to verify the audit log cleanly records User Created and Project Created events.

6. UI Navigation, Theme Controls & Aesthetics

Feature 6.1: Light & Dark Theme Switcher

Click the **Sun / Moon toggle button** in the top-right header navigation bar to seamlessly toggle between **Light Theme** and **Dark Theme**. The system preserves your preference automatically.

Feature 6.2: Search & Filter Toolbar Standards

All management pages (Activity Center, Users, Projects, Tasks) feature a unified toolbar containing:

- **Live Search Input:** Instant filtering as you type.
- **Select Dropdowns:** Status, Role, Stream, Member, and Timeframe filters.
- **Reset Filters Button:** Click Reset filters (N) to clear all active filter constraints in one click.

7. Frequently Asked Questions (FAQ) & Troubleshooting

Question / Issue	Resolution & Explanation
What does 'Health: On Track' mean?	On Track (Green badge) indicates the project is progressing smoothly and its target completion deadline is more than 5 days away .
Why is a button opening a blank screen?	All modal components are fully guarded against missing data. If an uncaught error occurs, refresh your browser or notify your administrator.
How do I export project reports?	Navigate to the Projects or Users page and click the Export CSV button in the top action header.
Why can't a Normal User see Activity Center?	Activity Center contains security audit logs (including login events and role changes) reserved for Administrators and Managers for compliance reasons.
