User Onboarding & Role Changes	✘ Restricted	✘ Restricted	✔ Full Control
Activity Center & Audit Logging	✘ Restricted	🟡 View Logs	✔ Full Control
Export Reports to CSV	✘ Restricted	✔ Yes	✔ Yes

2. Role 1: Normal User / Member Guide

Primary Objective

As a **Normal User (Member)**, your main focus is completing daily assigned tasks, tracking your personal workload, updating task states on the Kanban board, and adding progress remarks or attachments.

Key Features & Step-by-Step Instructions

Feature A: Managing Tasks on the Kanban Board

- 1. Access Kanban Board:** Click **Kanban** in the left sidebar menu.
- 2. Understand Kanban Columns:**
 - **To Do** : Tasks assigned to you that are ready to begin.
 - **In Progress** : Tasks you are actively working on today.
 - **Testing / Review** : Tasks completed and undergoing quality verification.
 - **Completed** : Delivered and closed tasks.

3. **Move Tasks (Drag & Drop):** Click and hold any task card, then drag it horizontally to another column (e.g. move from **To Do** to **In Progress**). The system updates the state in real-time.

Feature B: Adding Daily Remarks & Progress Logs

1. Click on any task card on the Kanban Board or Task List to open the **Task Details Modal**.
2. Scroll down to the **Daily Remarks** section.
3. Type your progress note in the text box (e.g., *"Completed database schema design and verified endpoint validation"*).
4. Click **Add Remark**. All team members and managers can view this chronological log.

Feature C: Attaching Files and External Links

1. Inside the **Task Details Modal**, navigate to **Task Attachments**.
2. **Upload File:** Click **Upload File**, select your document (PDF, PNG, JPG, ZIP, DOCX), and confirm upload.
3. **Add Web Link:** Click **Add Link**, enter the URL (e.g., GitHub Pull Request or Figma design link) along with a descriptive title, then click Save.

Practical Step-by-Step Example for Normal User

Scenario: Rahul (Software Engineer) begins work on Task **#34: Installation of TC Foundation** .

1. **Step 1:** Rahul opens **Kanban Board** and drags Task **#34** card from **To Do** into **In Progress** .
2. **Step 2:** Rahul clicks on Task **#34** card to open the Details Modal.
3. **Step 3:** Under **Daily Remarks**, Rahul types: *"Configured server environment and installed prerequisite packages on 10.0.1.5"*, then clicks **Add Remark**.
4. **Step 4:** Under **Task Attachments**, Rahul clicks **Upload File** and attaches **deployment_log_v1.txt** .
5. **Step 5:** Once verification passes, Rahul drags Task **#34** to **Completed** .

3. Role 2: Presenter / Manager Guide

Primary Objective

As a **Presenter / Manager**, your primary focus is presenting project metrics to stakeholders, monitoring project health, managing team workload balance, and identifying delivery bottlenecks.

Key Features & Step-by-Step Instructions

Feature A: Presenting Project Health & Task Breakdown

1. **Navigate to Projects:** Click **Projects** in the left sidebar menu.
2. **Review Health Badges:**
 -  **On Track** : Project running smoothly; target deadline is **more than 5 days away**.
 -  **Due Soon** : Target deadline is **within 5 days**.
 -  **Overdue** : Target deadline has passed without completion.
 -  **Completed** : Space delivered.
 -  **On Hold** : Project temporarily paused.
3. **Launch Project Detail Modal:** Click **View Details** (or click anywhere on the project row) to launch the **Project Detail & Task Breakdown Modal**.
 - Displays real-time completion %, total story points delivered, assigned team members with avatars, and full task breakdown list.
 - Perfect for live client or leadership presentations.

Feature B: Reviewing Team Workload & Performance

1. Navigate to **Users** page in the left menu.
2. Locate the team member card and click **View Workload & Performance**.
3. Inspect key indicators:
 - **Total Assigned Tasks:** Active vs Completed.
 - **Completion Rate %:** Percentage of delivered work.
 - **Story Points Delivered:** Points completed vs total.
 - **Overdue Tasks Count:** Tasks exceeding target dates.

Feature C: One-Click CSV Export for Executive Reporting

1. On the **Projects** or **Users** page, click the **Export CSV** button located in the top action header.
 2. An instant **.csv** report will download to your computer, pre-formatted for Microsoft Excel, Google Sheets, or PowerBI dashboards.
-

Practical Step-by-Step Example for Presenter / Manager

Scenario: Priya (Engineering Manager) conducts the Weekly Project Review meeting with directors.

1. **Step 1:** Priya opens **Projects** and filters status by **Active**.
 2. **Step 2:** She identifies a project with a  **Due Soon** health badge and clicks **View Details**.
 3. **Step 3:** During the screen-share presentation, she reviews the completion percentage (85%) and assigned team members.
 4. **Step 4:** She clicks **Export CSV** to download the official snapshot report to email to executive leadership.
-

4. Role 3: Administrator (Admin) Guide

Primary Objective

As an **Administrator (Admin)**, you possess full administrative governance across the entire platform: user creation and role assignments, project creation, workspace archival, and security audit log tracking.

Key Features & Step-by-Step Instructions

Feature A: Creating and Managing Project Spaces

1. Navigate to **Projects** page.
2. Click **Create Project** in the top action header.
3. Fill in the project creation form:

- **Project Name:** Name of the initiative.
- **Status:** Active, On Hold, or Completed.
- **Start & End Target Dates:** Selected via calendar picker.
- **Description:** Detailed space objectives.
- **Assigned Members:** Select team members assigned to this project space.

4. Click **Save Project**.

Feature B: User Onboarding, Status & Role Governance

1. Navigate to **Users** page.
2. **Onboard New User:** Click **Create User**, enter Full Name, Email, System Role (**Admin** , **Manager/Presenter** , **User**), and temporary password.
3. **Modify User Role / Status:** Click **Edit** on any user row to update their role or toggle account status (**Active** vs **Inactive**).

Feature C: Security Audit Center & Activity Tracking

1. Click **Activity Center** in the left sidebar menu.
2. **Filter Security Logs:**
 - **Search:** Search by user name or action query.
 - **User Filter:** Inspect logs generated by a specific user.
 - **Action Type Filter:** Filter by **Task Creation** , **Project Modification** , **User Role Change** , **Login** .
 - **Date Range:** Filter by Today, Last 7 Days, Last 30 Days, or Custom Date Pickers.
3. Click any log entry row to open the **Activity Detail Modal** displaying full timestamp, IP address, and payload JSON parameters.

Practical Step-by-Step Example for Administrator

Scenario: Amit (System Admin) onboards a new Senior Manager and initializes a new Project Space.

1. **Step 1:** Amit opens **Users** -> clicks **Create User** -> inputs Name: "Ananya Sharma", Role: "Manager", Status: "Active".
2. **Step 2:** Amit opens **Projects** -> clicks **Create Project** -> creates "Cloud Infrastructure 2026", assigns Ananya as Lead along with 4 engineers.

3. **Step 3:** Amit opens **Activity Center** to verify the audit log cleanly records `User Created` and `Project Created` events with complete timestamps.

5. UI Features & Navigation Reference

Global Theme Controls

- **Light & Dark Theme Switcher:** Click the Sun/Moon toggle icon in the top navigation header to seamlessly switch between **Light Theme** and **Dark Theme**.
- **Human-centric Clean Aesthetics:** Soft slate badges, high-contrast typography, and smooth micro-animations.

Search & Filter Bar Capabilities

- **Live Search:** Instant keyword search by title, description, name, or email.
- **Dropdown Filters:** Filter by Status, Progress Range, Stream, Priority, or Team Member.
- **One-Click Filter Reset:** Click **Reset Filters (N)** to instantly return to default views.

6. Exporting Reports & Data Guidance

How CSV Export Works

1. Navigate to **Projects** or **Users** page.
2. Apply any desired search filters (optional).
3. Click **Export CSV**.
4. The system generates a clean `.csv` file with column headers:
 - **Projects Export:** `Project ID`, `Project Name`, `Status`, `Health`, `Total Tasks`, `Completed Tasks`, `Completion %`, `Start Date`, `End Date`, `Description`.
 - **Users Export:** `User ID`, `Full Name`, `Email`, `Role`, `Status`, `Total Tasks`, `Completed Tasks`, `Overdue Tasks`, `Completion %`.

? 7. Frequently Asked Questions (FAQ)

Q1: What does "Health: On Track" mean?

Answer: `On Track` (Green badge) indicates the project is progressing smoothly and its target completion deadline (`end_date`) is **more than 5 days away**.

Q2: How do I change my assigned task status?

Answer: Open the **Kanban Board** and drag your task card into `In Progress` , `Testing` , or `Completed` . Alternatively, open the Task Details modal and update the status dropdown.

Q3: Why can't a Normal User access the Activity Center?

Answer: The Activity Center contains confidential audit logs (including login events, security logs, and role modifications) reserved strictly for Administrators and Managers for governance and compliance.

End of User Manual.
